

CSER

Confined Space Entry & Rescue

Scope

This program is designed for those who may be required to participate in the rescue of an incapacitated worker from within a confined Space. The course uses intensive training drill to give trainees the skills required to conduct confined space rescue safely and effectively.

This program will review safe working procedures for Confined Spaces. Trainees will learn the knowledge and skills required when planning and executing rescues from a variety of Confined Space. Knowledge and skills are acquired through a combination of lecture presentations, demonstrations and individual and team exercises. Trainees must successfully complete written and practical testing in order to receive course certification.

General Course Objectives

Upon successful completion of this course delegates should be deemed competent to carry out effective rescue efforts in a confined space environment.

Course Content

Delegates are required to successfully complete written and practical testing in order to receive course certification.

- Practical training exercises will be conducted in the confined space simulator using the following equipment:
 - Confined Space Regulations
 - Physical Hazards & Control Measures
 - Duties of Entrants & Attendants
 - Respiratory Protection
 - Casualty Packaging
 - Entry Programs & Permit Systems
 - Atmospheric Hazards & Control Measures
 - Confined Space Entry & Retrieval Equipment
 - Body Manipulation
 - Managing a Confined Space Rescue
- Practical training exercises will be conducted in the confined space simulator using the following equipment:
 - Portable Gas Detection Systems
 - Tripod Access & Retrieval Systems
 - Davit Access & Retrieval Systems
 - Respiratory Protection Equipment
 - Communications Equipment
 - Casualty Harnesses
 - Lockout Equipment
 - Spinal Immobilization Equipment
 - Positive Pressure Ventilation Equipment
 - Full Body Group E Harness
 - Rope-based Retrieval Systems
 - S.C.B.A. and S.A.R. Breathing Air Systems
 - SKED Stretcher Systems
 - Positive Pressure Ventilation Equipment
 - Full Body Group E Harness
 - Rope-based Retrieval Systems
 - S.C.B.A. and S.A.R. Breathing Air Systems

Accrediting Body: PT BARRON International
Course Duration: 3 Days
Course Validity: 3 Years
Course Venue: Bogor

Prerequisites:

- Valid medical certificate
