

HUET

Helicopter Underwater Escape Training

Scope

The Tropical HUET training programme will prepare delegates that intend to travel to and from offshore oil and gas installations and vessels by helicopter in a tropical environment by providing specific training in pre-flight and in-flight requirements and to equip delegates with the basic emergency response knowledge and skills required in the event of a helicopter emergency – with specific focus on escaping from a helicopter following ditching and sea survival techniques.

General Course Objectives

The objectives of the T-HUET Training are that delegates will be able to:

- a. Demonstrate, in a simulated environment, that they can use the safety equipment, and follow procedures in preparing for, and during helicopter emergencies – with particular focus on escaping from a helicopter following ditching.
- b. Demonstrate sea survival techniques.

Course Content

- Course introduction
- Check-in / boarding procedures
- In-flight, landing, disembarking
- Helicopter Safety requirements
- Helicopter Escape / Hazards during emergencies
- Pre-ditching checks / Actions after ditching
- Surface & Underwater Escape
- Escape training session (METS™), using mechanical and push out windows

Accrediting Body: PT BARRON International
Course Duration: 1 Day
Course Validity: 3 Years
Course Venue: Bogor

Prerequisites:

- Valid medical certificate

Optional Add-ons:

- Emergency Breathing Systems (EBS)
